EDUCATION

Master of Computer Applications

Techno India University

Oct. 2024 – 2026

CGPA: 7.81

Bachelor of Computer Applications

Techno India Institute of Technology

Jun. 2021 – Jul. 2024

CGPA: 7.86

EXPERIENCE

Computer Software Solutions

April 2026 – Present

SDE Intern — Express.js, MongoDB, Node.js, JWT, Google OAuth, REST APIs

Remote

- Built dual-auth system (email/password + Google OAuth 2.0) with JWT, bcrypt (10 salt rounds), and IP-based rate limiting (20 req/15 min), securing auth routes against brute-force while reducing registration friction.
- Architected 30+ RESTful endpoints across 9 domain modules in Express.js using MVC pattern, with regex product search, category filtering, and pagination (20/page default, max 100).
- Implemented two-tier RBAC middleware (protect + adminOnly) gating 15+ admin endpoints and enforcing user-scoped data isolation across orders, wishlists, and profiles.
- Secured API against OWASP Top 10 by composing a 4-layer middleware stack, NoSQL injection sanitization, Helmet.js headers, CORS whitelisting, and rate limiting across all endpoints.
- Built a single aggregated admin stats endpoint querying 7 MongoDB collections in parallel, delivering order, inquiry, banner, and user counts, eliminating 7+ separate client roundtrips.

PROJECTS

QuickBlog | React, Express.js, MongoDB, Node.js, ImageKit, Gemini API | [Live](#)

[Github](#)

- Built a full-stack blog platform using the MERN stack, implementing 15+ REST APIs for authentication, blog creation, commenting, and admin moderation workflows.
- Integrated JWT authentication, AI-assisted content generation (Gemini API), and image upload optimization using ImageKit, enabling structured blog publishing and content management.

AI/ML Disease Prediction | FastAPI, Python, Scikit-learn, Numpy, Pandas, MongoDB, HTML, CSS, JS

[Github](#)

- Built an ML-based app where users select symptoms and get predicted diseases using a Random Forest model.
- Designed a clean HTML/CSS/JS frontend for symptom selection and displaying prediction results.

Library Management System | HTML, CSS, JavaScript, FastAPI, SQLite

[GitHub](#)

- Built a library management system using FastAPI and SQLite, implementing core workflows for book issuing, returning, and availability tracking through structured backend logic.
- Designed frontend interfaces using HTML, CSS, and JavaScript to support administrative operations such as member management, overdue tracking, and record validation.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript

Front-end: React, HTML, CSS

Back-end: Express.js, Node.js, FastAPI, REST APIs

Databases: MongoDB, MySQL

Tools: Git, GitHub

Relevant Coursework: DSA, OOP, DBMS

CERTIFICATIONS

- SQL (Basic) HackerRank Certified

Feb 2026

LEADERSHIP EXPERIENCE

Technothon Club

Developer

May 2025 – Nov 2025

Techno India University

- Part of the core development team that built the Technothon website, used by 150+ students for event access.
- Built 10+ responsive UI components using React.js and Tailwind CSS, aligned with Figma design prototypes.
- Collaborated across teams to ensure on-time delivery for 3+ major events, improving deployment efficiency by 25%.
